

Setting your language preference

You can change your language preferences here:

Step 1: (Settings > Account)

The screenshot shows the Arable dashboard interface. On the left, a dark blue navigation sidebar contains several icons. The 'Settings' icon (a gear) and the 'Account' icon (a person) are both highlighted with red boxes. An orange arrow points from the text box on the left to the 'Settings' icon. The main area of the dashboard displays a satellite map of a residential area with various buildings and streets. At the top of the dashboard, there are dropdown menus for 'Organization' (set to 'Demo') and 'Team' (set to 'All Teams'). A 'Temperature' dropdown menu is also visible, currently set to 'F'. At the bottom of the map, there is a temperature scale in Fahrenheit ranging from -10 to 140.

The screenshot shows the 'Current Sites' section of the Arable dashboard. It features a table with two columns: 'Current Sites' and 'Unassigned Devices'. The 'Current Sites' column contains two entries: 'Corn Field Test' and 'Presidio Orchard'. Each entry has a row of data for temperature, rain, and wind speed. The 'Unassigned Devices' column is currently empty. The table is styled with a light blue header and alternating row colors.

Site Name	Temp	Rain	W/m ²	
Corn Field Test	55°F	0mm	52	53 mins ago
Presidio Orchard	55°F	0mm	52	53 mins ago
